

NEW

PM6 AVIATION HEADSET

The new Design4Pilots PM6 Aviation Headset is for General Aviation purposes and offers six main features:

- ✈ Active noise reduction (ANR)
- ✈ Built-in CO detector
- ✈ Stepless adjustable headband
- ✈ Two map-light LEDs
- ✈ Bluetooth (BT)
- ✈ Auxiliary socket (AUX)

Product link

Light weight

CO-detector

ANR function

Stepless adjustment

LED light

Bluetooth function

Optical CO-alarm light

Acoustic CO-voice alarm

Low contact pressure

Renewable merino wool

Optimized for long flights

Easy handling

The PM6 is a high-quality active noise-cancelling (ANR) Aviation Headset with two PJ connectors that combines comfort and safety in a particularly lightweight carbon material. Thanks to the stepless adjustment mechanism, the clamping pressure can be individually adjusted, while the memory foam covered with Merino wool offers maximum wearing comfort.

The built-in CO detector warns you with acoustic and visual signals against deadly carbon monoxide. With Bluetooth or the AUX input, you can enjoy your favourite music or listen to alerts from aviation apps, and the two integrated LEDs are particularly helpful during night flights.
